Hell Obelisco is a heavy metal supergroup consisting of various established musicians of Italian area, particularly of the Doom/Death/Sludge subgenre

All the band members were very prolific in the underground scene of the 1990/2000's, producing many demos and Albums with formerly acts as: Addiction, Monumentum, Schizo, Tying Tiffany, Evilgroove, The Dallaz, recording with labels as Earache rec. (Addiction "Break in Life" album 2004) Misanthropy rec (Moumentum "In Absentia Christi" 1995) and touring Europe and USA extensively through all the years and becoming a stable point in the music scene.

After 25 years of friendship the time has come to join forces and different creativity to create something that can be defined as "a cheerful boulder that comes along, and you are very happy to receive it right in the face".

So: joins us, praise Satan and worship Doom!
